Blog: dev.to/ackers93

## SKILLS & COMPETENCIES

- Javascript
- ReactJS
- NodeJS
- Python
- CSS Preprocessors
- Ruby on Rails
- Sinatra
- PostgreSQL

## VOLUNTEERING

### YOUTH GROUP LEADER

**Christchurch Christadelphians, 2012 - 2016**
- Organized weekly events for a wide range of people
- Hosted quarterly meetings with a volunteer committee
- Prepared for and co-managed various major events each year, requiring public speaking on a frequent basis.

### CONFERENCE COMMITTEE MEMBER

**Christadelphian Conference, 2013 - 2015**
- Organizing an international conference for 150 attendees
- Organized a multiple fundraising drives, including a fair, a café night, a restaurant evening and organizing a team of workers doing a variety of work to raise funds
- Other duties included sourcing and liaising with multiple catering companies and scheduling menus for the week

## ACADEMIC BACKGROUND

### LAMBDA SCHOOL

**Full-Stack Web Development 2019 - 2020**
- Utilized agile workflows on all projects
- Wrote production-ready code using ReactJS, Redux, Node, Express and Python
- Designed original user-experiences across a range of web and mobile platforms

### BCITO NZ

**Certificate in Carpentry, 2012 - 2016**
- Trained in a wide variety of carpentry and management techniques
- Taught apprentices in a 1:1 manner over the course of my own training
- Gained hands-on experience in management and health and safety

## PROJECTS

### KANSHA REWARDS

**A workplace recognition app for the purpose of showing appreciation within an organization.**
**React | Redux | NodeJS | PostgreSQL | Sass**
- Created Kansha with a nine person team over a two month period
- Built an admin dashboard to closely follow user engagement
- Implemented a Teams functionality to encourage interaction between teammates
- Optimized a clean onboarding experience for small and large organizations

### CAPTURE - EXPAT PORTFOLIO

**Photo sharing site for travelers to display their favorite memories**
**React | Redux | NodeJS | PostgreSQL | MaterialUI**
- Built with a team of eight over a one week period
- Created a NodeJS backend to match plan decided by team
- Solely responsible for all backend testing
- Wrote up all documentation for the NodeJS endpoints, with clear instructions on how to access them

View the code on Github

### BIG BRAND WELCOME SCREEN

**A building directory displaying a clock, calendar and weather updates for Big Brand Tire's HQ located in Moorpark, CA**
**React | Sass | Weatherbit API**
- Brought in information from an external API to display weather information
- Built specifically for a vertical 55 inch monitor in the Big Brand foyer.
- Implemented an external SVG library to display content depending on data brought in from the API
